Projects

FileGo [[Live](#)] | *Next.js, AWS S3, IAM, Node.js, TailwindCSS*

[GitHub](#)

- Built a highly secure and scalable file upload service leveraging AWS S3 with presigned URLs and IAM-based access control.
- Enforced complete end-to-end security with SSE-KMS encryption, ensuring compliance-grade protection to all uploaded files.
- Implemented multiple file sharing by generating archives using JSZip, uploading them to S3, and providing shareable links.
- Implemented flexible custom link expiration and auto-deletion policies to manage file validity and optimize storage costs.

DriveOn [[Live](#)] | *React.js, Express.js, Node.js, MongoDB*

[GitHub](#)

- Developed a full-stack car rental platform enabling users to browse, book, and manage vehicles.
- Implemented robust JWT-based authentication (signup/login) with encrypted password storage for enhanced security.
- Designed a dynamic booking system with date-picker and location-based vehicle filtering, enhancing user experience.
- Built a powerful admin dashboard for inventory management (add/edit/delete cars) and optimized page loads using ImageKit.

Sales Insight Data Analysis | *MySQL Workbench, Power BI*

- Designed a relational sales database in MySQL with 40+ customers, 50+ products, and 2M+ transactions, and integrated it with Power BI for visualization.
- Analyzed Rs.984M+ revenue across 4 regions, identifying top 20% customers driving 65% of revenue and seasonal spikes
- Built interactive dashboards with drill-down filters (Year/Month/Market), improving reporting efficiency and enabling data-driven sales strategies.
